# **HVAC University Learning Center**

**Driving Ventilation Knowledge™**

**Friday, April 26th - Portland**

Greenheck's HVAC University Learning Center is hitting the road to deliver **air distribution solutions** to you.

Greenheck recently added air distribution products to its comprehensive product offering making it even easier for specifiers to schedule a complete ventilation system from one supplier. Greenheck's air distribution product line includes an extensive selection of product types that meet standard to heavy-duty functional as well as aesthetic requirements in a wide range of building applications.

**Join Us for Lunch at 11am!**

**Date & Time:** Friday, April 26th 8am-4pm

**Location:** Johnson Air Products  
2220 SE 9th Ave. Portland, OR

**To RSVP:** Click [here](#), call 503-234-5071,  
or email [marketing@johnsonair.com](mailto:marketing@johnsonair.com).

**Greenheck's HVAC University Mobile Learning Center** contains hands-on, interactive demonstrations of the many products that can be used in air distribution systems. Engineers, building managers, and contractors enjoy seeing these innovative products up close and at a convenient location. Find out how they work. Talk to your knowledgeable product experts. Train your staff.

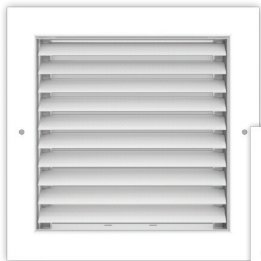

# Featured Products

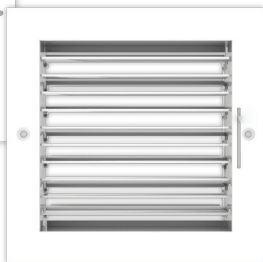

Achieve your potential.

## Grilles, Registers, Diffusers (GRDs)

GRDs play an important role in air distribution. Grilles cover duct openings where air is removed from the indoor space and returned to the HVAC system for reconditioning or to be exhausted from the building. Registers supply conditioned air into the indoor space, while diffusers push conditioned air into the space in a set pattern for optimal airflow distribution.

## Healthcare Laboratory Cleanroom (HLC)

Healthcare, laboratory, and cleanroom (HLC) air distribution products include laminar flow diffusers, radial flow diffusers, and surgical air curtains that are ideal for use in cleanrooms, hospital operating rooms, and patient isolation rooms, as well as laboratories and manufacturing facilities. Greenheck HLC products are designed, engineered, and tested to meet or exceed today's critical environment standards for airflow performance and filtration efficiency.

### Join Us for Lunch at 11am!

**Date & Time:** Friday, April 26th 8am-4pm

**Location:** Johnson Air Products

2220 SE 9th Ave. Portland, OR

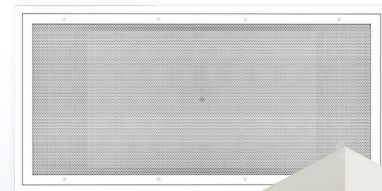

**To RSVP:** Click [here](#), call 503-234-5071, or email [marketing@johnsonair.com](mailto:marketing@johnsonair.com).

## Air Terminal Units (ATUs)

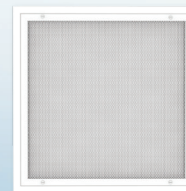

ATUs are zone-level air distribution devices that regulate airflow for maximum occupant comfort in variable or constant volume applications. Single duct, fan powered, dual duct, and retrofit ATU models are available.
