

Greenheck's Virtual

HVAC UNIVERSITY

HVAC University, Greenheck's popular training program designed for engineers offered in a virtual format.

- Several one hour classes offered each month.
- Live sessions led by Greenheck industry experts.
- Classes incorporate interactive multimedia to enhance your learning experience.
- Learn about HVAC trends, applications, changing codes and standards.
- Each class event qualifies for one professional development hour (PDH) credit.

Virtual HVAC University Classes

- November 7: Energy Codes and Their Impact on Fan Selection
- November 12: Laboratory Fume Exhaust

All classes held from 12-1 p.m. CST

Energy Codes and Their Impact on Fan Selection

This course will introduce the current fan efficiency metric and how it is applied. Criteria and methods for optimizing fan selection to minimize energy consumption will be presented. Revisions to ASHRAE standards and IgCC will be discussed. The 60-minute course will review the future ASHRAE and Department of Energy concerns regarding Fan Efficiency.

Laboratory Fume Exhaust

This course is aimed at familiarizing participants with the basics of laboratory ventilation and emphasizing the importance of codes and standards for laboratory design. AMCA's Induced Flow Ratings Seal will be explained along with a discussion on airflow measurement and controls.
