

Greenheck's Virtual

HVAC UNIVERSITY

HVAC University, Greenheck's popular training program designed for engineers offered in a virtual format.

- Several one hour classes offered each month.
- Live sessions led by Greenheck industry experts.
- Classes incorporate interactive multimedia to enhance your learning experience.
- Learn about HVAC trends, applications, changing codes and standards.
- Each class event qualifies for one professional development hour (PDH) credit.

Virtual HVAC University Classes

- February 18: Air-to-Air Energy Recovery
- February 26: Principles of Air Distribution—Fully Mixed Systems

All classes held from 12-1 p.m. CST

Achieve your potential.

Earn one Professional Development Hour
per session.

Achieve your potential.

Air-to-Air Energy Recovery

This course discusses the benefits of air-to-air energy recovery applied to ventilation systems and energy recovery technology (devices), pros and cons of available technology, psychometrics, payback analysis, and the latest energy standards and code mandates.

Principles of Air Distribution—Fully Mixed Systems

A deep dive into room air distribution principles for mixed air systems covering jet theory, room air induction, occupied zones, and data obtained from ASHRAE 70.
