

Greenheck's Virtual

HVAC UNIVERSITY

HVAC University, Greenheck's popular training program designed for engineers offered in a virtual format.

- Several one hour classes offered each month.
- Live sessions led by Greenheck industry experts.
- Classes incorporate interactive multimedia to enhance your learning experience.
- Learn about HVAC trends, applications, changing codes and standards.
- Each class event qualifies for one professional development hour (PDH) credit.

Virtual HVAC University Classes

- March 4: Conditioning High and 100% Quantities of Outdoor Air
CST
- March 11: Proper Application and Specification of Air Terminal Units
CDT

All classes held from 12-1 p.m.

Conditioning High and 100% Quantities of Outdoor Air

This course discusses common HVAC systems found in commercial and institutional applications and the methods used to condition high percentages of outdoor air with an overview and comparison of single-zone variable air volume (SZVAV), multi-zone variable air volume (VAV) and dedicated outdoor air systems (DOAS).

Proper Application and Specification of Air Terminal Units

This session includes a detailed review of types of air terminals and their application including energy usage, control strategy, and proper selections. Construction and installation are also covered, as well as a review of the codes and standards.
