

# Greenheck's Virtual

HVAC UNIVERSITY

**HVAC University**, Greenheck's popular training program designed for engineers offered in a virtual format.

- Several one hour classes offered each month.
- Live sessions led by Greenheck industry experts.
- Classes incorporate interactive multimedia to enhance your learning experience.
- Learn about HVAC trends, applications, changing codes and standards.
- Each class event qualifies for one professional development hour (PDH) credit.

## Virtual HVAC University Classes

- **March 10:** Beyond Compliance - Applying Fan Energy Index in Fan System Selection
- **March 24:** Understanding AMCA 500-Louver Weather Testing and Louvers for Specific Market Segments

*All classes held from 12-1 p.m. CDT*

### **Beyond Compliance - Applying Fan Energy Index in Fan System Selection**

This course will introduce the current fan efficiency metric and how it is applied. Criteria and methods for optimizing fan selection to minimize energy consumption will be presented. Revisions to ASHRAE standards and IECC will be discussed. The 60-minute course will review the future ASHRAE and Department of Energy concerns regarding Fan Efficiency.

### **Understanding AMCA 500-Louver Weather Testing and Louvers for Specific Market Segments**

This course focuses on the different louver weather test procedures within AMCA 500-L while providing valuable louver application guidelines. Additionally, this course will provide you with an understanding of most commonly applied louver types for specific market segments such as data centers and warehouse/distribution center projects.
