

HVAC University, Greenheck's popular training program designed for engineers offered in a virtual format.

- Several one hour classes offered each month.
- Live sessions led by Greenheck industry experts.
- Classes incorporate interactive multimedia to enhance your learning experience.
- Learn about HVAC trends, applications, changing codes and standards.
- Each class event qualifies for one professional development hour (PDH) credit.

Virtual HVAC University Classes

- November 4: Beyond Compliance—Applying FEI to Optimize Fan Systems
- November 17: HVLS Fan Design and Application

All classes held from 12-1 p.m. CST

Achieve your potential.

Choose from these courses and more. Earn one Professional Development Hour per session.

Beyond Compliance—Applying FEI to Optimize Fan Systems

This course will introduce the current fan efficiency metric and how it is applied. Criteria and methods for optimizing fan selection to minimize energy consumption will be presented. Revisions to ASHRAE standards and IECC will be discussed. The 60-minute course will review the future ASHRAE and Department of Energy concerns regarding Fan Efficiency.

HVLS Fan Design and Application

This course covers the proper selection and specification of high volume, low speed (HVLS) fans for different applications. An overview of HVLS performance testing, performance data, safety, and industry standards is included.
